- **ProPAD**

ProPAD aims to emerge as the industry-leading launchpad for upcoming multi-chain presales and introduce quality projects to our investors and ProPAD users.

Below is an insight into how this will be the best choice for an investor and project owners.

#### **FOR INVESTORS:**

Finding the best projects to invest in at an early stage and avoiding investment in scams or rug projects are one of the biggest challenges an investor faces nowadays. As per data provided by <https://www.comparitech.com/> till Oct 2022, \$25,314,089,196 dollars has been stolen from investors by rugs or scams and over the years rugs and scams are increasing day by day.

At 8BitEARN we are aiming to provide a rug free environment to ProPAD users with our unique and strict project screening methods. We are aiming to set a new benchmark by minimizing the early investment risks and safeguarding the investments with Crypto Insurance which will apply to all the ProPAD users going to invest in any presales on ProPAD for the first 60 days.

For the first 2 months, all the remaining raised funds other than liquidity will be vested and all the tokens, Liquidity, and contract will be handled by 8Bit Administrations.

#### **FOR THE PROJECT TEAMS:**

With our uniqueness in the token launch service area, we are aiming to have a great and big number of serious investors with us who will meet the financial requirements of projects easily.

Through ProPAD we are going to offer affordable and one-stop solutions to the project owners starting with contract creation, KYC, Audit, creating a private sale, presale, airdrop, liquidity locking, token locking/vesting, and a marketing platform with large serious investors audience to promote their project.

## **1. KYC & AUDIT SERVICES**

Under 8BitEARN KYC services, we are aiming to establish a trusted institution for doing the KYC of crypto project teams. The purpose of this service is to make the crypto space more reliable. This service also helps investors to make their evaluations and financial decisions.

8BitEARN offers contract audit services directed by experienced developer groups using various tools and their vast expertise to find flaws in smart contracts. We are going to provide a fast, thorough, affordable, and easy-to-understand smart contract security audit. We will audit custom smart contracts, DApps, NFTs, etc.

## **2. INVESTMENT INSURANCE ON ProPAD**

An insurance plan to cover investors' losses through any project launched at ProPAD and if found indulging in unethical practices and other sorts of manipulations that leads to investor losses. This Investment Insurance would be liable to cover the losses of whoever got scammed by such projects. We are bounded to reveal the KYC of such teams and expose them in front of all the investors and post their identities on the *Wall Of Shame* section. Strict actions which include filing lawsuits against them in their respective geographical locations will be taken.

### **• 8BIT DIGITAL STORE**

A Digital Store powered by the 8BitEARN Ecosystem with the facility to buy books, electronics, apparel, and fashion accessories using stable coins and 8Bit Tokens. We are aiming to launch this crypto-based Digital Store by Q1 2023.

## • MYSTERY UTILITY

With the release of Mystery utility, 8BitEARN Ecosystem will get another feather in its crown and it will open the doors for all our investors to become a part of something unique and huge.

## • MULTICHAIN BRIDGE

We are aiming to introduce a multichain bridge to trade 8BitEARN tokens between multiple blockchains like Ethereum, Solana, Polygon, etc.

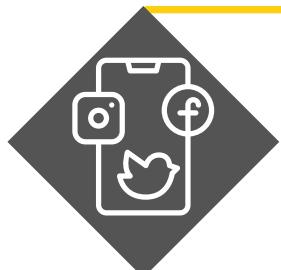

For single-chain projects, bridges are still the best solution, since they do not require liquidity on each chain, they remain alongside many other methods of cross-chain transfer. They are most useful when projects are launching straightforwardly as BEP20-like tokens.

To attract investors of other blockchains, we are not going to stick only with the BSC chain, instead, we have plans to spread our wings to other multiple blockchains.
